

Global Education for Teachers and Educating for Sustainable Development in Schools and Universities

Develop your global education & sustainability teaching practice with two free online **short courses**

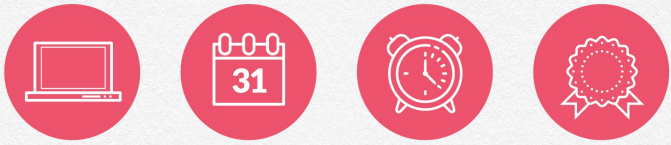

Designed and run by the world's leading centre for development education, global learning, education for sustainable development & global citizenship

Researchers at the **Development Education Research Centre** (DERC), within **IOE, UCL's Faculty of Education & Society**, have developed two free **FutureLearn** courses to support educators working in both universities and in schools

Global Education for Teachers supports teachers in schools to embed global learning and global citizenship education within their teaching

Educating for Sustainable Development introduces educators working in schools and universities to key ideas and practices related to education for sustainable development

Enroll now and help prepare your students for the global challenges of tomorrow

2 great courses | 3 week duration | 3 hours/week | Certified
